Cracked Purino Party With Keygen is a 'tap-to-match' puzzle game and takes place in different worlds with different themes. Each world has its own theme as well as a set amount of time for you to complete. If you'd like to combine more than one world's stages in one world, you're allowed to as long as the total time you complete would be higher than the total amount of time in each world. As you clear each stage, you can either advance to the next scene or play a cutscene. There are two types of stage: one type is comprised of four different puzzle patterns, whereas the other is a puzzle with a large amount of jewels and a maximum time limit. Other than puzzles, you can also play mini-games to earn more points. You can move the jewels anywhere on the board. However, in order to correctly move a certain number of jewels, the number of rings in the chain you create should always be a multiple of three. Once you've successfully moved a certain number of jewels, you're free to move them any place on the board. It's important to form chains with a maximum of four links in order to reach the required number of rings (21 in total). If you can't find a way to move any number of jewels, don't worry; you can still move them in a chain with a maximum of two links. The game will always calculate the number of jewels that can be moved. I hope you enjoy the game! Controls: - Swipe your finger to move the jewels. - Tap the jewels on top of a smaller jewel to add it to the larger one. - Tap on jewels in order to remove a jewel from the set. Luka E 2010-11-12 17:40:31 My review I love this game so much. Its one of the best games I've ever played. Its like Tap tap tap! and Purino party are mixed. I like that. It reminds me of mangle, and tap tap tap! mixed. Seriously, it is one of the best games I've ever played.

Maybe the only game I'd give a rating of 10/10. lidia
