Grass Valley Edius Crack is the world best tool..Q: Pattern matching using C++17 fold expressions I have following simple function which is written in c++17. I am using fold expressions to match the pattern. The main aim is to return the value x, if the pattern y is matched, and return value z otherwise. `template T getValue(const T& x, const T& y, const T& z) { return (y == 1)? x : z; }` I am testing it using the following. `auto test = [](const int x, const int y, const int z) -> int { return getValue(x,y,z); };` But the following error is coming main.cpp: In function 'int main()': main.cpp:16:54: error: no matching function for call to 'getValue(const int&, int, int)' return `getValue(x,y,z);`
