2D and 3D aerial photography. Note. This manual applies to version 2.4 of the Motion application and version 3.2 of the Postflight Terra 3D software. Check the included software version. This guide assumes that the software version is enabled and configured. For more information, see the Postflight Terra 3D Software User Guide. The Motion application provides the user with the ability to take 2D and 3D aerial photography and edit it using functions such as zoom, rotate and move. The Motion app allows you to take aerial photography using multiple cameras.
