

---

For example, to start with, you are used to your superior officer being in a position of great power and you submitting to him. When you start working with someone else, he can be in a position of great power. You start thinking, OK, I can take direction from this man. Or I can give him something and he can take it further to someone else, that is fair. But you must not question his abilities because his abilities were built on your work, and so your work cant be copied. And one day, you will be promoted over this man. It is the responsibility of the superior, and he is surely going to look after you, and you should be grateful for that. And you will be grateful for that, and this man will do great things, because of your work. If someone who is your superior oversteps the rules, you can complain to your immediate superior. If this does not work, then it can be escalated higher. If this does not work, then you can complain to your department head, who will complain to your command head who will complain to your chain of command. And if all else fails, finally you can complain to someone at Starfleet. In theory, after enough of these steps, your complaint will be taken seriously. In practice, you might be asked to stay off the base for a while, if you complain loudly enough. Absolutely phenomenal, love in and out. The biggest surprise is probably how good both the music and sets look (though, that may be because I remember the original show almost better than I remember the new one). Of course, thats also why I prefer music over the actual audio, and why I haven't watched it yet. I plan to get to it either this weekend, or when the kids are out of school (next week, if we get an early start on it). I tend to laugh at people who say its the worst TNG episode ever, so the bar is very low to make me actually want to see the new one. Which is probably why I'm so freaking excited about it! I do plan to watch some old TOS this weekend (First season of VOY, Enterprise, "Amok Time", "Mirror, Mirror"), and a movie this Sunday (Cocoon).

## Star Trek Tng Season 2 1080p Torrent

It feels a bit like me watching the new Star Wars and then going back and watching the old movies. I cant think of a better way to describe it. Although it feels appropriate since this show was my gateway into wanting to watch TNG. (Sort of like how watching the old Star Wars can make you want to see the new ones) It's hard to look at this show objectively, since this was the show that built the foundation of what Star Trek was going to be like from now on. There are definitely moments where it doesn't quite hit the mark (at least as well as the old show did), but as a whole it is worth the watch. Unless, of course, you're avoiding it because of the length (which I've found is the case for some people). It's an amazing length. But maybe thats just because it was, by leaps and bounds, the most excessive Trek to date. That was also at a time when there was no season-long arc, so the episode-to-episode link has to be stronger. And maybe the premiere also meant more to people than the previous three seasons, which were all pretty far from perfect (The high point was DS9's "Familiar"). But yes, its interesting that the first time I really sat down and watched the entire thing I had a very strong "I think I've lost some sort of critical mind" feeling. The second time I watched it I was like "Oh... this thing really works after all." And by "works" I mean that it's a well-made, enjoyable, if not (characters) great, show. Now I'm curious how far it will take me. We're only a couple episodes in, but I'm interested to see how it builds and how the major beats are handled. That's one of my favorite things about Trek, the emphasis on story and drama over rules and consequences. 5ec8ef588b
